

RESHAPE

—
Combined Technologies
for Beautiful Results

ALMA BEAUTY RESHAPE

RESHAPE by Alma Beauty is a new solution designed to boost the performance of beauty treatments for both face and body. This is a unique platform that combines two technologies - Radio Frequency (RF) and Ultrasound (US) - enabling new treatments and enhanced results. Based on Alma's gold standard medical device solutions, and incorporating the company's cutting edge technology, **RESHAPE** provides improved innovative capabilities.

Now you can offer your clients premium treatments that are affordable and effective – while taking your business to the next level.

The future of your business sure is looking beautiful.

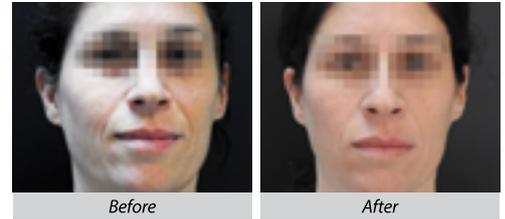

3 Applicators,
2 Technologies,
1 Great Solution.

RESHAPE enables tailored treatments based on your patient needs, by offering three different applicators to choose from:

SkinUp Radio Frequency for Tighter Skin

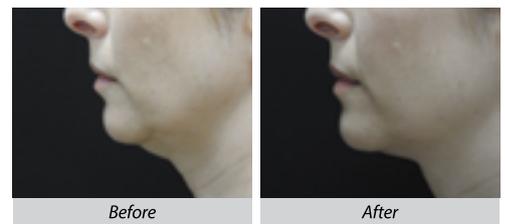

SkinUp is an RF applicator, which gently heats the skin to facilitate highly effective skin tightening treatments. This comprehensive and flexible applicator works well on different areas, including buttocks, belly, and underarm as well as the face. RF energy is focused on generating heat to target the dermal layer, which brings to new collagen formation for skin tightening, leading to visibly tighter and younger looking skin.

MiniSpeed Ultrasound for Fat Reduction

MiniSpeed is a revolutionary ultrasound-based applicator for fat reduction. Designed to treat small areas (mainly submental and under arm), and providing a face as well as body contouring solution, it delivers ultrasound energy effectively to the targeted area, reducing fat cells volume in stubborn areas. MiniSpeed Applicator allows you to define and control energy levels, selected from 8 pre-sets, for ultimate control and flexibility. The ultrasound wave frequency is monitored and maintained throughout the entire treatment, so that you can work continuously. Minispeed's extra smooth plate adds to the efficiency of treatments, while promoting an optimal experience for both you and your client.

Impact Deeper Treatments for Face

MIMILUZON
SKIN WELLBEING SECRETS

Impact is an applicator for skin rejuvenation and skin imperfections of the face. It harnesses the power of acoustic oscillations to enhance the effectiveness of the entire session - from cleansing and exfoliation to the application and penetration of therapeutic dermatological ingredients. Impact emits acoustic waves onto the skin to create a push and pull effect, while exfoliating the skin by removing dead skin cells and excess sebum. The treatment is easy to administer, safe for all skin types and can be performed all year round. Patients experience minimal to no discomfort or downtime and enjoy immediate, dramatic results. Impact is now offered with Mimi Luzon's proprietary serums, for outstanding results.
