

## ALMA BEAUTY SPA**DEEP**

ADVANCED BODY CONTOURING & FACE REJUVENATION

### LOVE YOUR SKIN

---

- Visible results that last
- Enhances skin tightness, texture & tone
- Effective on all skin types and areas
- Comfortable & safe, zero downtime

If only you could turn back the hands of time  
and reverse its visible effects, safely and comfortably.  
**Well, now you can.**

INTRODUCING  
**SPADEEP**

## SMOOTH, SUPPLE & SENSATIONAL SKIN **STARTS FROM DEEP WITHIN**

---

**SPADEEP** Goes Deep To Treat  
Numerous Indications, and  
Deliver Remarkable Results.

**SPADEEP** is a non-invasive system that utilizes concentrated thermal radiofrequency energy for body and face contouring, skin tightening and skin rejuvenation. This premium solution provides practitioners with more depth control, so that you enjoy visibly different results. The treatment is safe, comfortable, and effective on even the most sensitive areas.

Deep Contouring  
For Body & Face

**SPADEEP** effectively improves the shape and contours of various areas of the face and body. It tightens the skin to improve its texture, by inducing new collagen formation. With increased depth control, **treatments are more precise and effectively target any area**, while protecting the surrounding tissue so that results are focused and fabulous.

Improved Tightness,  
Tone & Texture

With **SPADEEP**, age-related skin imperfections, including wrinkles, fine lines, uneven skin tone and laxity are significantly improved. Stretch marks, superficial pigmentation and uneven skin texture are smoothed out and balanced easily and painlessly. Experience a new skin sensation - with no downtime.

Smooths Out Cellulite

A combination of RF energy and mechanical massage increases the metabolism of your skin's tissue, reducing fat cell volume, stimulating lymphatic drainage and visibly smoothing out skin texture.

## The Beauty of Advanced Technology

---

Alma's cutting edge technologies and personal approach ensure that you feel as great as you look and look as great as you feel

**SPADEEP Depth Control** Offers four levels of penetration depth, allowing practitioners to adjust the system parameters to match the indication and treatment area. Approaches may be combined, depending on the area, skin type/thickness, for best results

**UniPolar** Patented technology, enables deep yet safe heating of tissue at various skin depths. Delivers concentrated RF energy to the deeper layers of the skin without causing discomfort.

**AlmaWave 40.68MHz technology**  
Deep, homogenous heating for visible, long lasting results. This intense energy creates induces heating within the skin, contracting collagen fibers and stimulating the formation of new collagen to improve skin's thickness.

---

## SPADEEP Advantages

---

### Depth Control

Focused treatment at multiple depths allows for greater treatment control and better results, while leaving surrounding tissue unharmed.

### Safe & Effective

Safe and effective for all skin types, including thin and delicate areas of the face, neck and décolleté.

### Comfort

Gradual heating and integrated cooling system designed to support patient comfort throughout the treatment.

### No Downtime

Patients may resume normal activities right after treatment.
